**4. Brief analysis of dissertations considered by the Council during the reporting year, highlighting the following sections:**

**5.Proposals for further improvement of the system of training scientific personnel.**

Due to the lack of readiness for the defense of dissertation works in the specialty 6D010000 – Education (Defectology), there are the following recommendations for improving the activities of dissertation councils:

- Increasing the responsibility of scientific consultants for the timely implementation and protection of dissenting research by doctoral students led by them. Scientific consultants on doctoral theses left without defense, without a positive decision based on the results of their defense, should not be allowed to lead dissertations for two years.

- Strengthen control over the choice of topics and problems of doctoral dissertations. The focus of the dissertation research should be related to national priorities, state programs, or programs of fundamental and Applied Research.

-Activation of the work of scientific seminars at the departments: orientation to get acquainted with current news between publications in journals with a high impact factor, discussion of topical issues on the topics of doctoral theses (including in a foreign language), critical analysis and evaluation of the main results and provisions obtained by the participants of the seminar in the relevant field of research, discussion of research tools, discussion of intermediate and final results of scientific research and dissertations.

-Implementation of remote participation of foreign consultants in the work of the dissertation Council in online mode.
