

«Oscillations specific for the homogeneous rod like elastic structure on the kinematic absorber basis with rolling bearers having straightened surfaces»

From November 28 to November 30, 2018, in Cassino, Italy, was held an international conference «Second International Conference of IFToMM Italy «Advanced in Italian Mechanism Science», at which Professor of the chair «Physics», Bisembayev K. delivered a report on the topic «Oscillations specific for the homogeneous rod as a rolling bearer having straightened surfaces».

IFIT 2018

Second International Conference of IFToMM ITALY
28-30 November 2018, Cassino, Italy

CERTIFICATE OF PARTICIPATION

This is to certify that

Kuatbay Bisembayev

participated at the

2-nd International Conference of IFToMM ITALY

Cassino, November 28-30, 2018
