

Updated Education Content

Nowadays, the updating of the content of education is at the stage of very important transformations. Updating the content of education is a quality education based on the bright future, focused on achieving success and combining the educational process with new methods. In this regard, the 4th year students of our University have passed a 2-week course training. Students of chair of Preschool education and social pedagogy, majoring in 5B01200 – Social pedagogy and self-knowledge and 5B010100 - Preschool training and education completed a course of 48 hours. The course was conducted by the PhD teacher A. A. Alimbekova

During the course, students got acquainted with the features of the updated content of secondary education, learned to apply effective teaching methods, think critically, and ask effective questions

They also discussed such issues as: the level of thinking skills, Bloom's taxonomy, reading skills and what children must learn to be successful in the 21st century.
